DSpace

- DSpace is still an actively developed platform
- Attended DSpace Developer and Interest Group Meetings
- Met DSpace users and developers from around the World
- DSpace is still used by some prestigious institutions

DSpace 6

- To be released this fall!
- Features:
  - Compatible with Amazon Web Services. Store DSpace files in the cloud!
  - Export Search Results to CSV
  - Improved Searching

DSpace 7

- New Interface!!
  - Currently DSpace is supports two different interfaces that increases development time and splits the developers into two groups.
  - The new interface means all developers will be working on the same product!
- Benefits of new interface:
  - Faster loading times
  - Angler.JS (Google interface product)
  - AJAX Calls

Welcome to the DSpace Angular 2 UI prototype
The goal of this angular2-ui-prototype is to evaluate the Angular 2 framework as a plausible DSpace UI platform. This includes evaluating whether it meets the SEO needs of Google Scholar.
We are currently in phase two of development, which is preparing the prototype for the OR16 Conference in Dublin. This phase includes, but is not limited to:
Basic Authentication / Authorization
Ability to create Communities, Collections, Items
Improved theme (loosely based on Mirage 2)
Dynamically editable sidebar menu
Configurable, type-based deposit forms
This prototype is a collaboration by Atmire, Cineca, DuraSpace and Texas A&M.

Research Excellence Framework (UK)

Portland Common Data Model

"a flexible, extensible domain model that is intended to underlie a wide array of repository and Digital Asset Management Systems applications" --
https://github.com/duraspace/pcdm/wiki

Click to add text

A few other highlights…

- Dspace updates
- Rightsstatements.org

Going forward

- Canadian content
- Encouraging journals to list in these services
- Faculty awareness

Going forward

- Staying up-to-date
- Information disparities

Thank you!
